

For technicians: What were the main changes between AS/NZS 3760:2003 and AS/NZS 3760:2010?

In brief, the main changes are as follows:

1. Allowance for “[New To Service](#)” tags, containing specific information, to be applied to brand new equipment entering service for first time but not test and tagged.
2. Additional requirements for inspecting and testing welding equipment
3. Visual inspection process to include check for modifications to the equipment and it's accessories, connectors and so forth
